

SALAHUDDIN K M

Data Analyst | Business Analyst (Sales Operations Background)

salahuddinkm.skm@gmail.com | +91-8151026079 | Kerala, India

SUMMARY

Data Analyst with hands-on experience in Excel, SQL, Power BI, and Python, and a strong background in analyzing sales and operational data. Skilled in building dashboards, performing data analysis, and deriving actionable insights to support business decisions. Seeking entry-level Data Analyst or MIS Analyst roles.

SKILLS & TOOLS

Core Skills: Data Cleaning · Data Analysis · Data Visualization · Dashboard Development

Advanced Excel: Pivot Tables · VLOOKUP/XLOOKUP · Power Query · Charts & Dashboards · Data Validation · Conditional Formatting

BI & Visualization: Power BI (DAX, Interactive Dashboards, KPI Reports) · Tableau

Database & SQL: MySQL · SQL Joins · CTEs · Window Functions · Aggregations

Python Analytics: Pandas · Matplotlib · Seaborn · EDA · RFM Segmentation · Jupyter Notebook

PROFESSIONAL EXPERIENCE

Business Analyst (Sales Operations) | Zoya Business House, Sultanate of Oman

Sep 2023 – May 2025

Food manufacturing & distribution · Al-Musannah, Oman · Product imports: U.A.E, Indonesia, China, Pakistan, Turkey

- **Developed automated Excel dashboards to track daily, weekly, and monthly sales** performance across multiple product lines.
- **Analyzed order and inventory data** to identify stock movement trends and ensure accurate inventory tracking.
- **Analyzed customer purchasing behavior** to identify demand trends and support sales planning decisions.
- **Handled data across 500+ transactions monthly** to support reporting and tracking.
- **Collaborated** with sales and warehouse teams to ensure **accurate data flow** and smooth order fulfilment.
- **Reduced manual reporting effort** by ~20% by automating data processing and report updates using Excel functions and structured templates.
- Provided **data-driven insights to support business decisions** across sales and operations.

PROJECTS

Retail Sales Analysis Dashboard (Excel | MySQL | Power BI) —GitHub: [Link](#)

- Queried sales data using **SQL** (joins, aggregations) to analyze revenue trends
- Cleaned and transformed data using **Excel Power Query**
- Built an interactive **Power BI dashboard** with **KPIs** (Revenue, Sales Growth, Product Performance)
- Identified **top-performing categories** and **monthly sales trends**

E-Commerce Data Analysis & Customer Segmentation (Python | Pandas | Matplotlib | Seaborn | Jupyter Notebook) —GitHub: [Link](#)

- Conducted **EDA** using **Pandas, Matplotlib, and Seaborn**.
- **Analyzed customer behavior** and **revenue patterns**.
- Applied **RFM segmentation** to categorize customers into **high-value and low-engagement groups**.
- **Generated insights** for targeted marketing strategies.
